Today's Agenda

Conference presentations in R/RStudio with Rmarkdown

Get Ready for Class by:

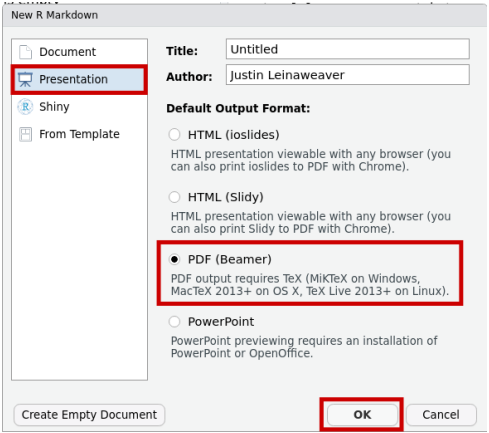
1. install.packages("tinytex")
2. tinytex::install_tinytex()

Justin Leinaweaver (Fall 2021)

Goal: Design a Conference Presentation

For Your Notes: New Presentation Slides

- New RMarkdown document
- "Presentation"
- "PDF (Beamer)"



Install a LaTex Distribution (once per install)

```r
## 1. The tinytex package will
##      install a mini-LaTex
install.packages("tinytex")

## 2. Run the following function
tinytex::install_tinytex()
```

New Template File: Presentation_Notes.Rmd

How to Organize Your Class Data

- PLSC 296: Data Analysis
  - 01-Getting_Started_Notes
    - Getting_Started_Notes.Rmd
    - Image1.jpg
    - Presentation_Notes.Rmd
  - 02-Freedom_House
    - All_data_FIW_2013-2021-tidy.xlsx
    - Data_Project_1-Freedom_House.Rmd
    - Exploring_Freedom_House_Data.Rmd

1. Download new files to your "Getting Started" folder
2. Open `Presentation_Notes.Rmd`
3. `Knit` the slides

Let's go through the Notes

1. Hidden chunk for library and loading data
2. New slides '##'
3. **italics** and ****bold****
4. Bullet points
5. R code chunks with the echo argument
6. Slides with figures
7. Two column layouts
8. Include external images

New File: Data_Project_1-Presentation.Rmd

- Hypothetical Presentation: 8 minutes
  - Report sections 1, 2 & 5: 1 slide each
  - Report sections 3 & 4: 1-2 slides each
- Show, don't tell (e.g. viz > words)
- 'Knit' as you go!

For Tuesday

1. Finish your slides with a **theme** and a **color**
2. **Upload** your slides to the Moodle workshop ('Assignments')

```
---
title: "Untitled"
author: "Justin Leinaweaver"
date: "9/13/2021"
output: beamer_presentation
---
```

```
---
title: "Untitled"
author: "Justin Leinaweaver"
date: "9/13/2021"
output:
  beamer_presentation:
  theme: "?"
  colortheme: "?"
---
```

1. https://bookdown.org/yihui/rmarkdown/beamer-presentation.html#themes
