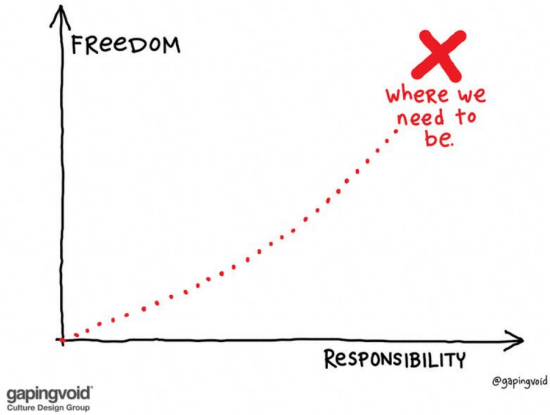
Today's Agenda

Work on Section 3 of the Data Project 2 Report

Justin Leinaweaver (Fall 2021)

Pizza, Politics and Freedom



FREE pizza

Friday, October 8th @ noon

The plaza outside Stone Chapel

Brought to you by the Meador Center for Politics & Citizenship

Data Project 2: NMC

Prepare a report **introducing and analyzing** our second data project.

Sections (By Argument)

1. Why is this project important?
2. How confident should we be in the methodology?
3. **What does the world look like according to this data in 2016?**
4. How is the world changing across time according to this data?
5. Based on your analyses how can we best use this data project to understand the world?

Brainstorming Section 3: Ideas to Test?

- `cinc`: The Composite Index of National Capability (CINC) score
- `irst`: Iron and steel production (thousands of tons)
- `milex`: Military Expenditures (1816-1913 thousands GBP, since 1914 thousands USD)
- `milper`: Military Personnel (thousands)
- `tpop`: Total Population (thousands)
- `upop`: Urban population (pop in cities $>$ than 100,000; in thousands)
- `pec`: Primary energy consumption (thousands of coal-ton equivalents)

Brainstorming Section 3: Ideas to Test?

- `cinc`: The Composite Index of National Capability (CINC) score
- `irst`: Iron and steel production (thousands of tons)
- `milex`: Military Expenditures (1816-1913 thousands GBP, since 1914 thousands USD)
- `milper`: Military Personnel (thousands)
- `tpop`: Total Population (thousands)
- `upop`: Urban population (pop in cities $>$ than 100,000; in thousands)
- `pec`: Primary energy consumption (thousands of coal-ton equivalents)

Task 1: 2016 Only

- Visualize each with a histogram
- Map CINC

Brainstorming Section 3: Ideas to Test?

- `cinc`: The Composite Index of National Capability (CINC) score
- `irst`: Iron and steel production (thousands of tons)
- `milex`: Military Expenditures (1816-1913 thousands GBP, since 1914 thousands USD)
- `milper`: Military Personnel (thousands)
- `tpop`: Total Population (thousands)
- `upop`: Urban population (pop in cities $>$ than 100,000; in thousands)
- `pec`: Primary energy consumption (thousands of coal-ton equivalents)

Task 2: 2016 Only

- Re-build the CINC score manually
- Build a new CINC score with a different weighting
